PROFESSIONAL SUMMARY

Innovative and research-driven Computer Engineering student specializing in **Artificial Intelligence, Machine Learning, Data Analytics, and Security Systems**. Skilled in developing AI models, building data pipelines, and designing intelligent systems with real-world applications. Known for strong leadership, analytical thinking, and delivering measurable results in team and independent projects. Seeking opportunities in **AI research, data science, and applied machine learning**.

EDUCATION

BSc in Computer Engineering (Department of Smart Computing)

Kyungdong University Global Campus (Expected July 2026)

- **CGPA:** 4.27 / 4.5
- **Relevant Coursework:** Algorithms, Machine Learning, Data Structures, Computer Security, Probability and Statistics, Formal Methods, Cybersecurity and Cryptography

Uganda Advanced Certificate of Education - Mengo Senior School (Oct 2019)

- Majors: Physics, Economics, Mathematics, Computer Studies

CERTIFICATIONS

Cisco Networking Academy (Verified Credentials)

- **Data Analytics Essentials** - Feb 21, 2026
- **Introduction to Modern AI** - Feb 19, 2026
- **Python Essentials 2 (Cisco x OpenEDG)** - Feb 19, 2026

TECHNICAL SKILLS

Programming: Python, C/C++, Java, R, MATLAB
AI & ML: Deep Learning, NLP, Probabilistic Models, Geometric Deep Learning
Data & Analytics: Pandas, NumPy, Scikit-learn, SQL, Excel, Tableau, Data Visualization, AWS
Tools & Technologies: Git, Jupyter, VS Code, Linux, Gradio, Stable Diffusion
Hardware: Arduino, Microcontrollers
Security: Cryptography, Network Security, Penetration Testing

RESEARCH & PROJECT EXPERIENCE

AI-Based Emotional Support App - Team Leader

- Led development of an AI application providing context-aware, empathetic responses.
- Designed and trained sentiment-analysis and intent-recognition models.
- Managed data acquisition, model tuning, UX testing, and prototype deployment.

Social Media Sentiment Analysis (AWS-Powered)

- Conducted large-scale analysis on **50,000+ social media posts** using AWS pipelines.
- Generated visual analytics to extract behavioral and trend insights.
- Delivered a structured report influencing decision-making.

Text-to-Image Generation Pipeline (Diffusion Models)

- Built a Stable Diffusion system with Gradio for **prompt-based image generation**.
- Optimized model performance under constrained compute environments.
- Completed a full research thesis documenting architecture, experiments, and results.

LEADERSHIP & VOLUNTEER EXPERIENCE

President, Programming Club - Kyungdong University (2022–2026)

- Organized workshops on AI, Python, data science, and software engineering.
- Mentored students in ML model development and deployment.

Tech & Innovation Team Lead

- Led AI study groups and collaborative research projects.
- Coordinated hackathons and coding challenges.

Community Tech Volunteer

- Delivered introductory AI and Python training to non-technical students.
- Helped bridge digital skills gaps through hands-on demonstrations.
